

# INFORMATION SHEET

## SUPPLY CHAIN MAPPING SOFTWARE PROVIDERS

ATIF provides this list of providers for information only. It is based on information collated from a variety of sources. Users of this provider list should satisfy themselves as to the type of service to be provided and that the service to be provided matches their needs. Providers are not listed in any particular order. ATIF disclaims all liability from users of this list engaging one or more providers and the outcomes that are provided.

### Known providers

### Info

#### Osapiens

(note this is targeted to the EUDR and Due Diligence process may not comply with ILPR, to be confirmed). Collects data in a supplier portal, links to AI and geospatial data, collects geo locations. Conducts a risk analysis for legality and then deforestation assessment, prepares DDS and submits due diligence statements automatically.

<https://osapiens.com>

Via contact form on their website

### Sourcemap

Traceability tool with Geo-Data Validation. Plots of land linked from suppliers in bulk and contains a validation tool re deforestation-free status and reporting. Uploads to the EU Traces platform and captures the reference number needed to clear customs. Supply chain mapping software allows visibility, verification and transparency.
